# EUROcounter ET

- Take the structure out of the transport bag. Place it with the wheels on the floor and so that the graphic panel is facing away from you. Pick the structure up by the top aluminium crossbars and pull upwards. The structure will open and lock itself automatically.

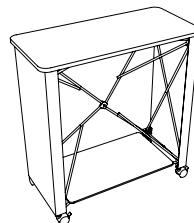

- Place the desktop so the holes fit over the rods.

- Attach the sides of the graphic panel to the velcro hubs at the back of the counter.

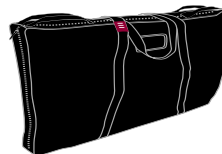

- Insert the shelf onto the bottom aluminium crossbars so that the magnets connect.

- You have finished the set up.

## packaging

Transport bag for EUROcounter ET

**Note:**  
For interior use only!
