

**EUROsystem**

[p]art of perfect presentation

# EUROsystem

part of perfect presentation

EUROsystem, the third generation of portable display systems, not only sets new standards in handling but also opens new dimensions to shape. It offers you more than just standard graphic systems as it opens doors to original and dynamic ways of presentation. The magnetic system and the unique simplicity of its components and connectors allow new and innovative ideas to become part of the design of exhibition stands. Building small exhibits or large three-dimensional booths in only a very short time is now a simple task.

Design Create Build and Innovate!

▲ EUROsystem created by FRAGMA for an exhibit in Mallorca.

► EUROsystem designed by Infoscan.

► STAND OUT using EUROsystem for the Mobile Marketing Conference in Moscow.
